Dear

There has been some industry interest in obtaining quarterly or semi-annual statistics on U. S. exports by company. It is suggested that the information be broken down by both brand and type as well as specifying companies or areas, i.e. South America, Central America, Europe, etc. as a further discussion, a separate line would relate to U. S. stores and forces.

It is doubtful whether all of this would be published publicly but some part of it would probably be used in my quarterly review indicating the trends of the various major brands.

Please let me know if this project is of interest to you.

Sincerely yours,

John C. Maxwell, Jr.
