

RESUME

Name: Mauricio A. GONZALEZ
Birth Date: December, 4th 1962
Mailing Address: Laboratory of Cellular & Molecular Biology-ICC., University of Chile,
 Las Palmeras 3425, Nuñoa, Santiago, Chile. Fax: (562) 218 6245
Citizenship: Chile.

EDUCATION.

1995-1997 **Postdoctoral Fellow.** INTA. Cell Biology Unit, University of Chile.
 1989-1994 **Ph. D. Cellular & Molecular Biology**, Catholic University of Chile, Santiago
 Thesis: Functional Organization and Subcellular Localization of Mip-90,
 Novel Microtubule-Interacting Protein. LCMB, University of Chile
 with the Prize to the best Doctoral Thesis by the Biological Society of
 Chile). Thesis Director: Prof. Dr. R.B. Maccioni
 1982-1987 **Licenciature in Biology**. Faculty of Mathematics and Basic Sciences, Catholic
 University of Valparaíso, Chile.

FELLOWSHIPS

1995 ICC INTERNATIONAL FELLOW. CSIC (Spain)-ICC (Chile) Program. At the
 Laboratory of Biomedical Research, Spanish Research Council (CSIC), Madrid
 1992-1993 Fellow from the Program CSIC-ICC to work in the Universidad Autónoma,
 Center of Molecular Biology "Severo Ochoa", Madrid, Spain.
 1992 Fellowship from the ICC and the Iberoamerican Federation of Cell Biological
 Societies.

RESEARCH EXPERIENCE.

1991-Present **ASSOCIATE INVESTIGATOR.** International Center for Cancer and
 Developmental Biology (ICC), Laboratory of Cellular & Molecular
 Biology (LCMB).
 1996-Present **Assistant Professor.** INTA. University of Chile.
 1993-1995 Research Associate in the FONDEF Project PI-10 for research in Technological
 applications of knowledge: Project "Cellular and molecular signals in
 development of the rainbow trout and applications to reproductive
 management". Laboratory of Cellular & Molecular Biology (LCMB).
 1991-1993 Research Associate in Project CI*CT-91-0876 awarded to Prof. R.B. Maccioni,
 from the Directorate General XII of the European Union. "Monoclonal anti-
 idiotype antibodies as probes to investigate molecular signals involved
 in the control of microtubule assembly". Laboratory of Cellular and Molecular
 Biology of the ICC, Chile.
 1992-1993 Assistant Professor. Graduate Program in "Structural Biology". Faculty of
 Sciences. Metropolitan University, Santiago, Chile.
 1988 Research Assistant. NSF Project at the Cellular and Molecular Neurobiology
 Unit, Catholic University of Chile.

RESEARCH GRANTS AS A PRINCIPAL INVESTIGATOR

1994-1996 Principal Investigator in the FONDECYT 1904367 Project: "Functions of
 MAPs isotypes and Mips proteins in transformed cell lines".
 1994-1996 Principal Investigator Project 93-130 RG/BIO/LA. of the Third World Acad. of
 Sciences (TWAS) "Intracellular roles of MAPs in the regulation of microtubule
 assembly".

SCIENTIFIC SOCIETIES: Regular Member of the American Society Cell Biology (ASCB) and the
 Society of Cell Biology, Spain.

SUMMARY OF RESEARCH ACTIVITY

Publications as Full Papers: 19
 Publications as Abstract : 31
