Job No.

Monthly Report for the

Month of January 1955

J. P. Clingman
Signature

During the month of January 14 samples of tobacco were smoked for their pH of Smoke. Seventeen packs of cigarettes were burned to determine their burning time.

One hundred and seven (107) samples of tobacco were analysed for % Total sugar. We are now preparing to change our present sugar method to the Somaggi procedure as modified by Mr. R.H. Cundiff.

Nicotine determinations for the month were as follows:

Regular nicotine - 181
Total Alkaloids, Nic. & Nor. Nic. 66

The Biochemical group are altering their cupilation determinations per sample as follows:

	Past Determinations	Present Determination
Total Alkaloids	3	3
Nicotine	3	3
Nor Nicotine	3	0
Sand	\$5	\$5
Nitrogen	\$5	\$5
Potash	6	3
Chlorides	6	3

#65 Machine shop had submitted 6 samples of Lead Base Babbit Metal for Tin, Antimony, and Lead determinations.
