Subject: 1983 Segmentation Study
(Can't we use a better name for this?)

The attached notes are divided into several sections:

- A. Enhancing 1981 learning
- B. New topics and issues
- C. Data processing
- D. Study design

Beyond this 4-part division of topics, there is no structure to the notes. I have just written down thoughts, questions, suggestions as they came to mind.

There are still a few more notes, files, subjects I need to review. If any comments come out of it, I'll forward them.

Joan
