

DALE M. COULSON, MANAGER
ANALYTICAL, PHYSICAL, AND INORGANIC CHEMISTRY
CHEMISTRY LABORATORY
PHYSICAL SCIENCES DIVISION

HK 1122038

Specialized professional competence

- Analytical chemistry; equipment and methods development; pesticide residue analysis; trace inorganic and organic analysis

Representative research assignments at SRI (since 1953)

- Contaminating properties of spacecraft materials
- Analyses of traces of organically bound sulfur, halides, and nitrogen
- Mercury in the environment
- Automation in analytical chemistry
- Analytical chemistry of photographic developer solutions
- Development of methods for constituents of smog
- Chemistry and purification of boron
- Thermodynamic studies of methods of production of sodium
- Pesticide residue analysis
- Automation of drug residue analysis in tissues
- Trace metal analysis
- Electron microscopy
- Electroanalysis
- Methods of analysis for asbestos in air and water
- Manager, Analytical, Physical, and Inorganic Chemistry
- Program manager of Analytical Chemistry
- Chairman, Analytical Chemistry Department

Other professional experience

- President, Coulson Instruments Co.
- Assistant professor, University of Colorado
- Research technologist in analytical chemistry, Shell Oil Co.
- Instructor in instrumental analysis, University of Wisconsin

Academic background

- B.S. in chemistry (with honors, 1947) and Ph.D. in analytical chemistry (1950), University of California (Los Angeles)

Publications and patents

- Fifty publications
- Four patents

Professional associations and honors

- American Chemical Society
- Research Society of America
- Phi Lambda Upsilon
